

**Field Study Report on topic entitled “ Awareness of Rural Women on Domestic Violence Act 2005 : A Study at Ghinai Village, Dibrugarh” conducted at Ghinai Village on 03.03.2017**

A field study was conducted by the teachers and students of Department of Sociology on 3<sup>rd</sup> March, 2017 at Ghinai ,a remote village of Dibrugarh district . Under the guidance of 4nos. professors of Department of Sociology, a total of 44 students have conducted the study. Out of the total household of the study area, i.e., 380 household, 220nos household were selected for this study on the basis of sampling method. The cooperation of the respondents has made this study fruitful. The required information for this study (data collection) was collected with the help of Interview schedule and systemic observation. A pilot survey were conducted earlier to ensure the availability of the respondents, nos. of total population of the universe, the composition and housing pattern of the village area as well as the boundaries of the village with a purpose to frame the research design for the study. The students as investigator under the guidance of teacher have started their data collection process by 10:00a.m. and by the time 3:30p.m. they have completed the task with great enthusiasm.

At the end of the field study, the students were provided lunch which were locally arranged at the study village. On the basis of the collected data, study reports were prepared by the students and were submitted to the Department of Sociology. From these reports a compiled research report were prepared by the Department of Sociology which can be considered having relevance and importance in the present crisis situation of domestic violence or violation of human rights.

**REPORT ON FIELD STUDY CONDUCTED BY THE STUDENTS OF DEPARTMENT OF SOCIOLOGY  
ON " AWARENESS OF PEOPLE ON HEALTH AND SENITATION" AT GHINAI VILLAGE, DIBRUGARH.**

A field study was conducted by the student of sociology on 03-03-2017 at Ghinai village which is one of the adopted village of Namrup college. The topic of the study was "AWARENESS OF PEOPLE ABOUT HEALTH AND SANITATION ." The main objectives of the study were to know about the awareness of people about health and facilities provided by the government under 'Rural Sanitation Programme.'

In the field of study 230 respondents were selected randomly by the student. In the study it is found that all the respondent are not aware about the Rural Sanitation Programme as most of the respondent are illiterate and partially literate. The housing condition of the people is very poor. They live in a very unhygienic environment. 50% of total population have their own sanitary toilet provided by government. About 45%of total respondent are not getting the benefits of government and the quality of sanitary toilet is very poor. About 05% of the respondent does not have any toilet. They use the toilet of other household and sometime use to go to the nearby paddy fields or

It is also found in the study that the people of that locality were not conscious about their health. They do not have any safe drinking water facility. They use to drink water from pond, well or tube well. Due to that they have to suffer from many diseases

**Reports on Field Study conducted by the students of Department of Sociology on the topic "Health Awareness among the people of Tiyokia Naga Villege, Namrup."**

A field study was conducted On 22<sup>nd</sup> April 2019 by the student of sociology at Tiyokia Naga Gaon. The topic of the field study was " Health Awareness Among the People of Tiyokia Naga Gaon."

The Tiyokia Naga Gaon is a small village, where there are only 88 households. Among them 22 households belongs to Tea-garden labour, 11 belongs to Assamese community and the others are Naga people ,Beside the Assamese community who follow the Hindu religion the rest of the people follow the Christian religion.

The village is located in Choraideo district of Assam. The village is surrounded by Patkai hill in the East, Dangorikumar in West, Dilli River in the North and Bimlapur in the South.

In the study it was found that 50% of the total respondent suffer from Malaria, Jaundice, T.B. They also suffer from fever and headache .Among the respondent it is found that 26 respondent (about 90%) used the medical treatment. Only (10%) 5 respondents are found who prefer traditional treatment method.

In traditional method they used to pray to heal their suffer and considered it as effective .While asking question about consuming alcohol it is found that about 11% of total respondent consume alcohol weekly and sometime .At the same time they are also conscious about the harmful effect of consuming alcohol and smoking.

The people of that locality are aware about the health programmes which are launched by government and they have also PHC in their locality but medicines and doctors and medical staff are not available at time.
